WALTER GASTHAUS Gleis- und Tiefbau GmbH & Co. KG

Walter Gasthaus Gleis- und Tiefbau GmbH & Co. KG is an independent and modern medium-sized track construction company, which was founded in 1920 and is based in Duisburg.

Our field of activity covers the whole spectrum of railway construction. We provide construction services and more for numerous customers: for Deutsche Bahn AG, for the operators of urban railways, tramways, and underground railways, as well as for industrial and private railways.

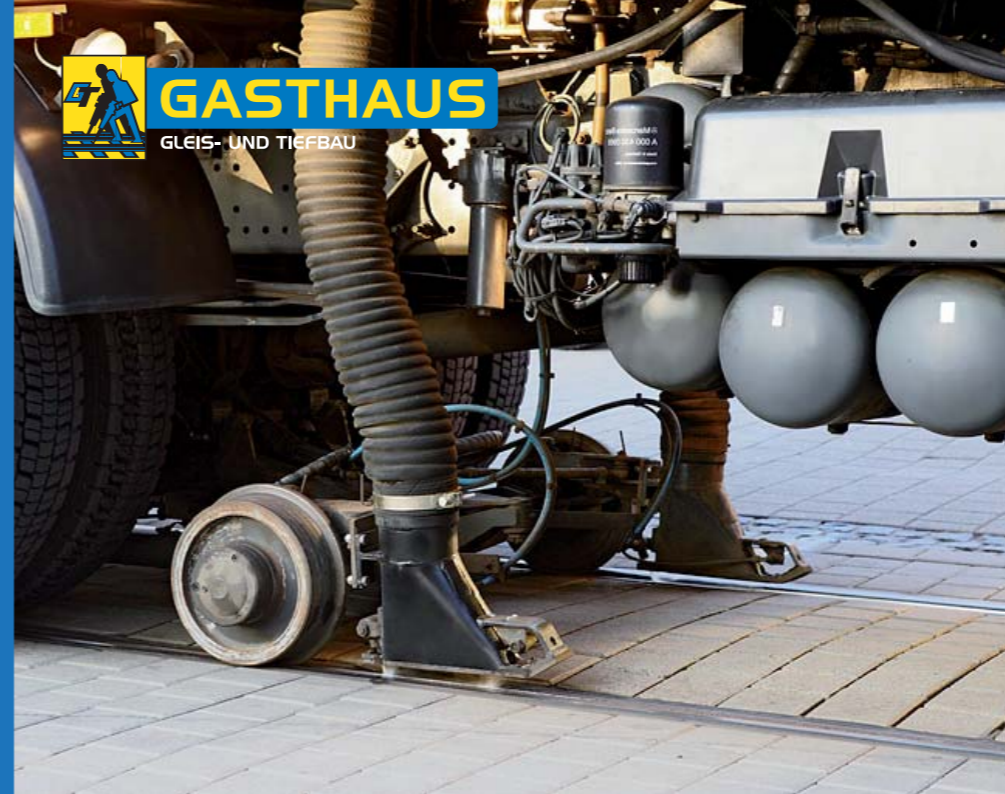

We have the relevant technical and managerial staff, a modern fleet and equipment park, as well as all the permits and certificates for providing high-quality services in the field of track infrastructure.

TRACK MAINTENANCE

We can carry out grooved-track and track-bed cleaning, as well as chemical and mechanical vegetation control to improve the positional stability of your tracks, in a targeted manner to meet your needs.

Our services:

- Mechanical cleaning of grooved tracks using the rail-road cleaning vehicle LOCTRAC ZW 210
- Mechanical track-bed cleaning using a suction procedure to remove overlying dirt, such as brake dust and leaves.
- Chemical vegetation control using DB AG-licensed ZW-Unimogs, including the obtaining of approvals from the authorities.
- Mechanical vegetation control, year-round maintenance of embankments, edges and structure clearances.
