WALTER GASTHAUS
Gleis- und Tiefbau GmbH & Co. KG

Walter Gasthaus Gleis- und Tiefbau GmbH & Co. KG is an independent and modern medium-sized track construction company, which was founded in 1920 and is based in Duisburg.

Our field of activity covers the whole spectrum of railway construction. We provide construction services and more for numerous customers: for Deutsche Bahn AG, for the operators of urban railways, tramways, and underground railways, as well as for industrial and private railways.

We have the relevant technical and managerial staff, a modern fleet and equipment park, as well as all the permits and certificates for providing high-quality services in the field of track infrastructure.

Engineering and construction of craneways

We plan and create craneways that are specially tailored to the operation of your crane, with attention paid to the most economical solution regarding construction, maintenance and servicing costs.

Our services:

- Preparation of geological surveys and statistical calculations
- Specifications and constructive planning for your crane system
- Craneway construction on raft and deep foundations
- Welding work and technical abrasive track finishing
- Servicing and maintenance in our full service option
