WALTER GASTHAUS Gleis- und Tiefbau GmbH & Co. KG

Walter Gasthaus Gleis- und Tiefbau GmbH & Co. KG is an independent and modern medium-sized track construction company, which was founded in 1920 and is based in Duisburg.

Our field of activity covers the whole spectrum of railway construction. We provide construction services and more for numerous customers: for Deutsche Bahn AG, for the operators of urban railways, tramways, and underground railways, as well as for industrial and private railways.

We have the relevant technical and managerial staff, a modern fleet and equipment park, as well as all the permits and certificates for providing high-quality services in the field of track infrastructure.

WELDING TECHNOLOGY

We are special service providers for all welding procedures and grinding work on DB AG tracks, on urban railways and tramways, industrial and private railways.

Our services:

- Joint welding using TW (thermite welding), MF (metal flux-cored wire welding) and AW (arc welding) procedures.
- Build-up welding using MF (metal flux-cored wire welding), AW (arc welding) and SAW (submerged arc welding) procedures
- Abrasive re-profiling and corrugation removal
- Neutralization of tracks; monitoring and carrying out of voltage equalizing
- Electrical separation of tracks and points, creation of insulated rail joints, Type MT
